COAT/COLOR:

Length: Medium, long enough to carry two bands of ticking.

Texture:

Bronze and Black Silver - resilient, close-lying

Black Smoke - fine, silky, close-lying

PATTERN: There is good contrast between pale ground color and deeper markings. The forehead has characteristic tabby "M" and frown lines which run between the ears and down the back of the neck, becoming elongated spots along the spine. On the haunches the spine lines meld into a dorsal stripe which continues to the tip of the tail. The tail is banded with the tip dark. The cheeks have mascara lines, from the corner of the eye along the contour of the cheek, with the second line starting at the center of the cheek and curving upward, almost meeting the first line below the ear. There are one or more necklaces, broken in the center. The shoulder markings are a transition between stripes and spots. The upper legs are heavily barred but do not necessarily match. The spots on the body are random, with variance in size and shape. The pattern on

the sides of the body may be unmatched, but spots should not form a broken mackerel pattern. The haunches and thighs have stripes which break into elongated spots on the lower leg. Belly spots should have good contrast against pale ground color.

COLORS:

Black Silver: Markings are charcoal to black with good contrast. Back of ears grayish-pink tipped with black.

Upper throat, chin and nostrils silver, appearing white.

Bronze: Color darkest on saddle, fading to tawny buff on sides and creamy ivory on undersides. Back of ears tawny pink tipped in dark brown. Bridge of nose ochreous. Upper throat, chin and nostrils pale, creamy white.

Black Smoke: Charcoal gray to black with silver undercolor with no ticking. All markings jet black with enough contrast to make a well-defined pattern plainly visible.

ALLOWANCES: Broad head and jowls in mature males. Very muscular necks and shoulders in mature males. Allowance is made for changing eye color, with some discernable green by 8 months of age and full green eye color by 18 months of age.

PENALIZE: Lack of green ring in eye color of cats over the age of 8 months and amber cast in eye color in cats over the age of 1.5 years. Short or round head; pointed muzzle; full cheeks, small ears; small, round or oriental eyes; cobby or oriental body, short or whippy tail; spots on body which run together; unbroken necklaces; poor condition.
