### **HEAD:**

The trapezoidal head with high set rounded cheeks and blunt muzzle is longer than wide. The wide chin is moderately developed.

Profile: The slightly curved profile ends in a medium long, broad nose, which curves slightly roman.

Ears: The ears are medium sized, slightly diagonal and placed far apart. They are broad at the base and have a rounded tip.

Eyes: The eyes are oval, large and open. They stand slightly diagonal and in far distance to each other. The eyes are uniformly coloured. All eye colours are permitted.

Blue and odd eyes are allowed only in pure white, van, bicolor providing there is a white mask.

### **BODY:**

The German Langhaar is a large, well muscled cat, with a long, rectangular body.

The chest is round and well developed, the neck is strong.

Legs/Feet: The muscular legs are of medium length; the large feet are round and firm and tufts between toes.

Tail:

The tail is of medium length, broad at the base and becoming more slender ending in a slightly rounded tip.

### **COAT:**

The cat has a long coat, a collar and "Knickerbockers" (fluffy coated trousers on the backlegs).

The coat is of shining, silky structure and has undercoat. Preference is to be given to a long coat that divides down the spine.

All coat colours are permitted.
