Color	8

CATEGORY: Traditional.
DIVISION: Solid.
COLOR: White ONLY.

**PERMISSIBLE
OUTCROSSES:** Cats
born in Thailand,
Malaysia, Burma or Viet
Nam with average,
moderate body and head
type. Cat breeds that
originate in Thailand,
have proof of Thai
ancestry with moderate
conformation resembling
SE Asian cats: Korat,
Maew Boran.

HEAD:

Shape: Modified wedge, medium width, moderate length. From full front, face appears elliptical, with focus points just below outer corners of eyes. Fairly prominent cheek bones lie along an inner ellipse with same focus points. Tip of nose and tips of ears form points of equilateral triangle. Inner eye corners lie along line from nose tip to ear tip.

Eyes: Moderately large plump oval, but not oversized, nocturnal or protruding. A bit more than an eye widths apart. Lines drawn from corner to corner of each eye slant toward 10 and 2 o'clock. Eye color may be odd, one blue and one green or yellow, two blue, two green or two yellow. One or both eyes may be pigmented with both blue and another color. Brilliance of eye colors and eye color contrast preferred. All eye colors accepted. Points are evenly divided between eye color and shape/size/set.

Ears: Slightly large, wide at the base with oval tips, a bit longer than width at base. Ears should point toward 11 and 1 o'clock. A bit less than an ear base width apart. Allow for light furnishings.

Muzzle: Medium long and wide. Moderate muzzle break, forming boundary of hemispheric, rounded muzzle.

Chin: Moderate, proportion to the nose

Forehead: Long, very slightly convex.

Profile/Nose: Nearly straight, but with slight, straight, downhill slope from brow to just below the eyes. Nose may have slightly convex profile.

Neck: Medium long and width.

BODY:

Torso: Medium. Underbelly is mostly firm, level and parallel to the ground,

but some loose skin on the underbelly is permissible.

Musculature: Very firm, but not meaty or heavy. Males should have more muscle than females, but not to be cobby or thick-necked.

Boning: Medium to slightly refined in females and slightly robust in males.

Legs: Medium to medium long.

Feet: medium oval in shape.

Tail: Medium. In proportion to the body, tapering to the tip. Tail tip kinks accepted.

COAT/COLOR:

Length: Medium short coat, naturally varies with environmental temperature.

Texture: Resilient and slightly open, smooth enough to reveal musculature, Moderate under coat, very natural, not overly groomed, not coarse nor very fluffy, naturally varies with environmental temperature.

Color: white.

ALLOWANCES: Stud jowls in males. Males also have significantly heavier chest and shoulder musculature. Colored spots limited to the head in kittens and young adults. Tail faults that do not significantly shorten the length of the tail or significantly distract from the overall appearance.

PENALIZE: Males resembling females in size, boning or musculature; females so large, heavy in boning or musculature that they resemble males. Round eyes. Oriental eyes. Short or blunt muzzle; very long or pointy muzzle. Narrow upper head or narrow space between the ears; small ears, very large ears, or ears set low or high (significantly above or below 11 and 1 o'clock.

Very straight profile. Tail fault that noticeably shortens the length of the tail.

WITHHOLD ALL AWARDS (WW):

Roman profile; pronounced stop; pronounced convex forehead. Fluffy or stand-out coat. Cobby body. Obesity. Colored markings or clumps of hair on cats over 18 months of age. Paw pads and nose leather other than pink.

DISQUALIFY (DQ):

Crossed eyes. Visible protrusion of the cartilage at the end of the sternum (xiphoid process).
